Advanced NMR Techniques for Biomarkers Identification

By Debora Paris

LAP Lambert Acad. Publ. Dez 2010, 2010. Taschenbuch. Book Condition: Neu. 220x150x8 mm. Neuware - Nuclear Magnetic Resonance spectroscopy has emerged as a key tool for understanding metabolic processes in living systems. Recently, a new approach to elucidate metabolism and its mechanisms appeared to the scientific community scene. It is metabolomics: an analysis based on very few assumptions on the biochemical processes that occur in living systems, mainly investigated by advanced spectroscopic techniques including mass spectrometry and NMR spectroscopy. The development of new spectroscopic tools for high throughput analysis of selected biochemical pathways is crucial for metabolome investigations. The purpose of the present work was to explore the recent NMR improvements by applying and developing new metabolomic strategies for biomarkers discovery, including NMR data handling, peaks quantification and fast data acquisition. This book is integrally extracted from my PhD thesis. 128 pp. Englisch.

Reviews

This created publication is wonderful. it absolutely was writtern extremely completely and beneficial. I discovered this publication from my dad and i encouraged this publication to discover.

-- **Kristina Kshlerin DDS**

Complete guide! Its this kind of very good read through. I really could comprehended almost everything out of this written e publication. Your lifestyle span is going to be transform the instant you complete looking over this book.
