## FOOTPRINTS IN STONE: FOSSIL TRACES OF COAL-AGE TETRAPODS (PAPERBACK)

[DOWNLOAD](#)

The University of Alabama Press, United States, 2016. Paperback. Book Condition: New. 2nd ed.. 229 x 152 mm. Language: English . Brand New Book. The Steven C. Minkin (Union Chapel) Paleozoic Footprint Site ranks among the most important fossil sites in the world today, and *Footprints in Stone* recounts the accidental revelation of its existence and detailed findings about its fossil record. Currently 2,500 miles from the equator and more than 250 miles north of the Gulf of Mexico, the Minkin site was a swampy tropical forest adjacent to a tidal flat during the Coal Age or Carboniferous Period more than 300 million years ago. That fecund strand of sand and mud at the ocean's edge teemed with the earth's earliest reptiles as well as amphibians, fish, horseshoe crabs, spiders, jumping insects, and other fascinating organisms. Unlike dinosaurs and other large animals whose sturdy bodies left hard fossil records, most of these small, soft-bodied creatures left no concrete remains. But they did leave something else. Preserved in the site's coal beds along with insect wings and beautifully textured patterns of primeval plants are their footprints, fossilized animal tracks from which modern paleontologists can glean many valuable insights about their physical anatomies and behaviors. The paleontological examination of fossil tracks is now the cutting-edge of contemporary scholarship, and the Minkin site is the first and largest site of its kind in eastern North America. Discovered by a local high school science teacher, the site provides both professional and amateur paleontologists around the world with a wealth of fossil track samples along with an inspirational story for amateur explorers and collectors. Authoritative and extensively illustrated, *Footprints in Stone* brings together the contributions of many geologists and paleontologists who photographed, documented, and analyzed the Minkin site's fossil trackways. An...
