

Essentials of electricity a textbook for wiremen and the electrical trades direct currents

Filesize: 5.93 MB

Reviews

A superior quality book along with the font employed was exciting to see. It is one of the most amazing book i have got read through. You wont really feel monotony at anytime of the time (that's what catalogs are for about in the event you ask me).

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 60 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 Excerpt: . . . of the field of a modern two-pole dynamo is shown in Fig. 115. The path of the magnetic lines is shown in Fig. 116. Fig. 114. Pole piece and field coil. Fig. 115. Westinghouse two-pole motor or generator. Fig. 116. Path of magnetic lines in modern two-pole generator of Fig. 115. In setting up a motor or generator it is necessary then to note the polarity (whether a pole is north or south) and to cause the current to flow in such a direction through the field coils as to make the poles alternately north and south. 56. Fields Separately or Self-Excited. Direct-current generators are classified as to the source from which the field coils receive their electric current. They are: Separately excited, when the field current comes from some outside source, as storage cells, exciter generators, etc. Self-excited, when the field current is drawn from the armature of the machine itself. 57. Separately Excited Field. Self-excited machines sometimes change their polarity when not in use. It is customary, therefore, to use a separately excited generator whenever it is desired that the current shall never change its direction. This point is of greatest importance in electroplating. Fig. 117 represents the connections for a separately excited generator supplying current to a set of electroplating vats. The fields are excited from a Fl-n7. Separately excited gen, iii j. i erator. supplying current to storage battery, thus insuring, , J fo, i. , Tt 110 electroplating vats, a permanent...
