The second message is that, people who are more engaged in the landscape tend to be more critically concerned with its maintenance, and more likely to have factored the environment into their decision to choose the locale, in this case the CCNCA, as their place of preferred recreation. Schreyer and Knopf (1984) suggested that individuals with a strong place attachment serve as reliable indicators of place quality for a variety of user groups. Finally, this type of research can serve as a useful tool for identifying individuals or groups who ought to be included in public involvement processes. One of the most important roles for the agency is to establish mechanisms to listen to citizen concerns. Community residents and visitors can contribute invaluable knowledge about local, ecological, societal, and economical perspective to the discussion of natural resource management. Integrating this type of knowledge into resource planning and management would represent a significant shift...
