Createspace, United States, 2014. Paperback. Book Condition: New. 254 x 178 mm. Language: English . Brand New Book ***** Print on Demand *****.Computer appreciation is the technology impart of understanding computer through learning and practicing the first-step of its composition, scope, and operations in ICT World. This is for basic, but for advanced, it is to support the computer application knowledge of the intermediate and advance computer users, who perform their daily activities with computer. By comparison, appreciation is different from application, which is the technical impart of understanding how to use application programs of computer through practices. Meaning that their key different is the ability to perform effectively in application via the knowledge gained from the appreciation. Following this point, the package of CAplus is to help users gain and improve in both appreciation and application. To achieve this point, the package is organized into CAplus-1, 2, 3, and 4 books. The CAplus-1 consists of section-one and two. The Section-One contains chapter one to five with topics on history of computer, the meaning, attributes and uses of computers, including the classifications of computer, common components basic operations of computer relatively. The Section-Two is titled building computer career, which comprises six examples of computer career topics, with cases of teaching students on how to build and enhance computer careers through educational system, participatory in application program training, and relative software to each specialized area of the career. The CAplus-2 was written for advanced-level in order to help students in studying of computer s components. To support its central teaching, the book explained the hardware and software components of computer, and how they function systematically in the work process of computation. In this form, the knowledge-gained about these components will help students in learning computer maintenance and repair, troubleshooting identification, and...
