The ore is rich, and, containing calcareous spar, reduced to metal without the addition of any W other substance. It lies very irregularly; mi centsi limestone of a schistose appearance. The-mass of ore is some parts upwards of sixty feet in thickness. Like the peasantry, the miners are-l mostly proprietors of land. The whole surface of the mountain is divided in patches of differ- ent dimensions; all cultivated and watered with the utmost assiduity, and clothed with luxuriantvegetation. Aug. 31. ---From Tarascon to Foix; still descending towards the plain, through a romantic rocky vale. From Foix to Pamier; no longer mountainous, butialluvial hills of quartzose sand, or of schist assuming the character of clay, with some calcareous rocks. From Pamier we pass over a vast sandy flat, bounded by sand hills of poor quality, to the Garonne, which we cross by a ferry two leagues above Toulouse. Here the land is richer, and as we approach Toulouse, is extremely fertile. Two strong oxen yoked by the horns to the beam of a light plough, of pretty good construction, the ploughman driving them by means of a long-stafi-which answers the double purpose of a goad and a paddle, are performing their work in a style which some English farmers might; envy. This is an improvement on the poor...
