Reviews

A brand new e book with an all new point of view. I have got read and i am sure that i am going to likely to read through once more once more in the future. It is extremely difficult to leave it before concluding, once you begin to read the book.

When this has happened, we have counted each boiler separately, believing that in this way a fairer idea of the amount of damage may be had. It is difficult to make up an accurate list of the killed and injured, because in making out our lists we have to depend largely upon the newspapers, and the accounts we find there are often unsatisfactory. We have spared no pains, however, to make the summary as accurate as possible, and in some cases we have gone over as many as twenty accounts of a single explosion in order to extract such information as we could concerning the injuries and the loss of life involved. So far as we could learn there have been 269 explosions during the year, which resulted in the death of 298 persons, and in injuries to 442 others. During 1891, there were 257 explosions, resulting in the death of 263 persons and in injuries to 371 others. It appears, therefore, that the explosions of 1892 have been worse, on the whole, than those of 1891; for they have been Hr0r1 numerous, and the number of persons killed and injured has been greater, both absolutely and relatively. It should be understood that this summary does not pretend to include all the ex plotions of the year. In fact, it probably includes but a fraction of them. Many accidents have undoubtedly happened that were not considered by the press to be sufficiently newsy...
